

GRADUATE ARCHITECT

This position entails comprehensive involvement in a diverse range of projects within the firm.

Responsibilities will include the following:

- Development of design concepts including three dimensional modeling in consultation with project Lead Designer
- Creation of presentation graphics
- Team collaboration on design solutions
- Development of construction documents
- Coordination of drawings with all engineering disciplines
- Research of local code requirements
- Assisting with construction administration including RFP responses and supplemental drawing development

Graduate Architect will be involved in analyses of problems in conceiving and developing architectural solutions in tandem with the project team. This begins in the conceptual design phase and continues the duration of each project.

Requirements:

- BA/MA Degree in Architecture
- Student Internship experience
- Proficient in Revit and AutoCAD
- Excellent communication skills
- Excellent time management skills
- A strong commitment to quality and attention to detail

Preferred Skills:

- Proficiency with SketchUp including modeling and rendering
